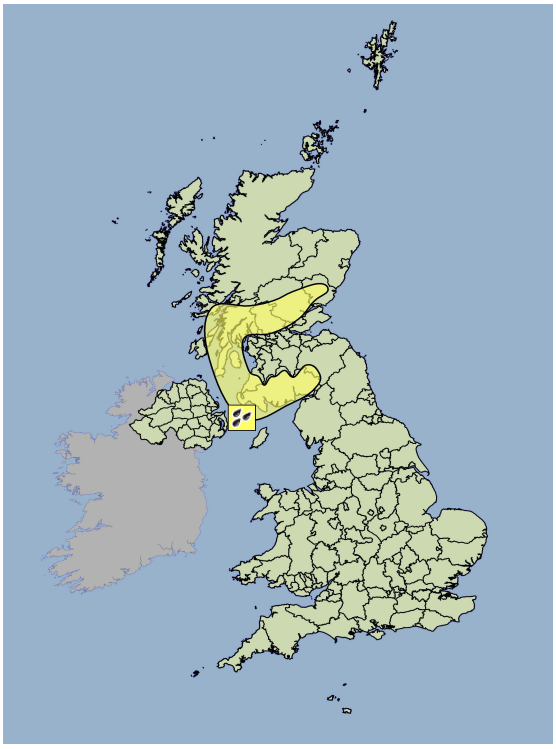
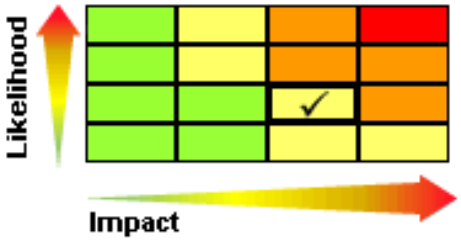
National Severe Weather Warning Service





Chief Forecasters Assessment
A deepening area of low pressure will move northeast towards Iceland with an active frontal system moving east across the UK during Thursday and Friday. The heaviest rainfall will be over south facing hills across western areas. 50-75 mm of rain is likely over some prone upslopes of southwest and central Scotland, with some short spells of heavy rain at lower levels as well.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **15:00 on Thu, 06th Nov 2014** until **15:00 on Fri, 07th Nov 2014**

Outbreaks of rain will spread east across Scotland during Thursday, becoming heavy and persistent across some central and western areas, before clearing from the west during Friday.

The public should be aware of the risk of localised flooding and potential disruption to transport.
